

The first facility of its kind within Indonesia, Drydocks World – Graha is a modern purpose-built rig and offshore construction yard with the ability to build jack-up or semi-submersible rigs.

Graha has the capability and resources to undertake turnkey projects for any offshore requirement. It is capable of delivering up to 5 rigs per year and the yard is currently undergoing significant expansion to accommodate 2 additional building berths.

## DRYDOCKS WORLD - GRAHA FACILITIES

(YARD SITE - 52 HECTARES)
